## LAMINATE DOORS

---

Lamination is a process of pasting of laminated sheet with heat & pressure. It is intended to give a long life to the ply or the material beneath. The substance used for the process affects the feature of the doors. The doors undergo the process of lamination with equal pressure and bonding against the traditional time consuming manual process on site.

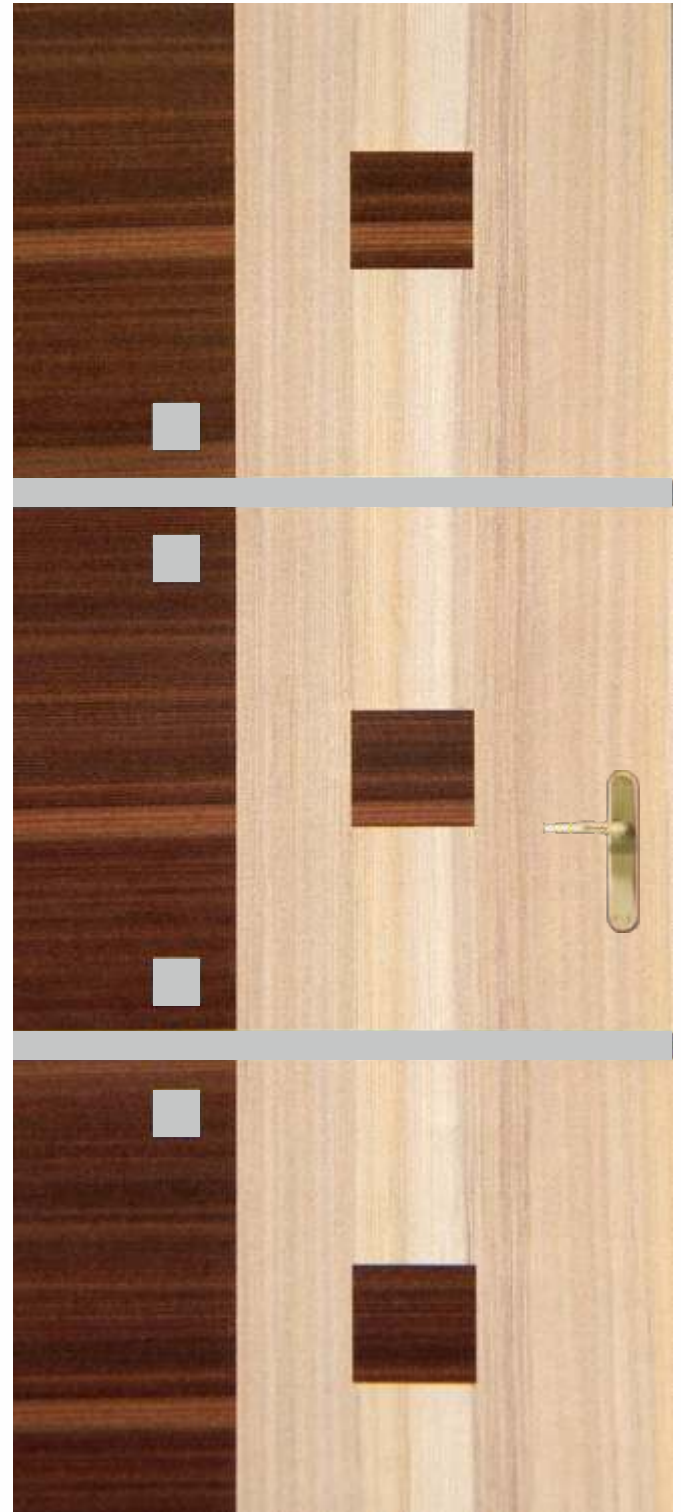

**AMAR DOORS**

## METALIC LAMINATE DOORS

Metalic Laminated doors made from High Quality door Skins, which gives elegant and modern look and enhances the beauty of the door, They are ideally suited to be used as Main Doors and Interior Doors.

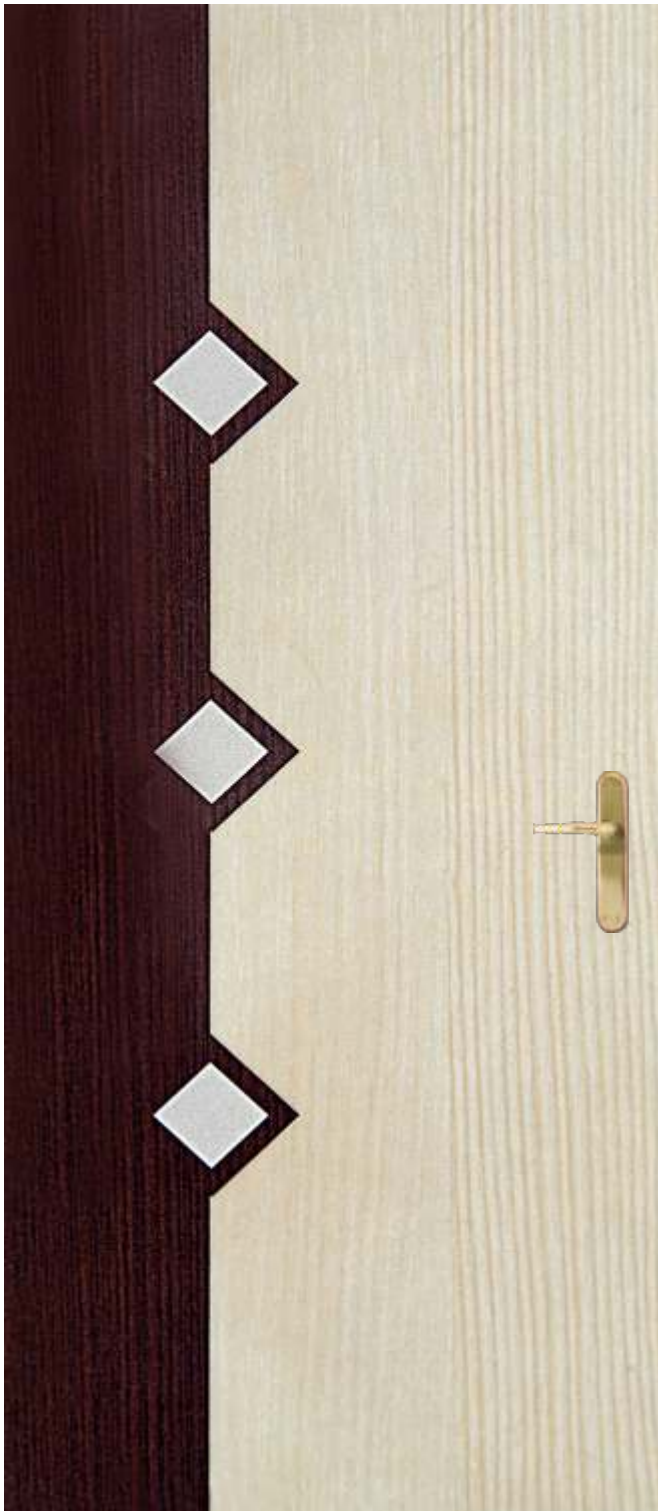

**AMAR DOORS**

## NON-METALIC LAMINATE DOORS

Non-Metalic Laminate Doors also ideally suited to be used as Main Doors & Interior Doors

**AMAR DOORS**

## FIRE RETARDANT DOORS

---

It is solid core, hot process wooden fire retardant flush doors which undergo strict quality control in order to resist severe fire and serve its purpose at a specific time.

Different parts of the building are separated from each other into compartment by a fire resisting construction in which opening for escape or other day-to-day activities are closed by doors, which have a precise function to fulfill in case of fire.

Our Fire Retardant door is constructed in such a way so that it can withstand the severity of fire, for specified time.

Thickness available in 40 mm, 45mm & 50 mm made out of hard wood only with fire rating of 1 and 2 HRS.
